

Rock Blasting and Overbreak Control Short Course

By: Dr. Calvin Konya

When: October 3 through 5, 2017

Where: ODOT Flanders Building, 123 NW Flanders Street,
Portland, Oregon

Cost: \$450

The Oregon Department of Transportation is providing the short course Rock Blasting and Overbreak Control on October 3rd through 5th at their Flanders office in Portland, Oregon. This class is designed for *Engineering Geologists, Geotechnical Engineers, and Construction Inspectors*. Participants at the conclusion of the class will be able to evaluate ground conditions for blasting, design and check a blast design, design for vibrations and damage control, design for airblast control, conduct pre and post blast inspections and develop blasting specifications. All are very important tasks for project development and construction.

This class will be led by Dr. Calvin Konya, a world renowned expert in rock blasting. Dr. Konya originally developed this course for FHWA and taught the course through FHWA for many years. This is an amazing opportunity to learn from a professional with over 40 years of experience in the industry.

To enroll you must sign up through iLearn. Once you log into iLearn paste the link below.
