

PanGEO, Inc., a Seattle-based geotechnical engineering firm, is seeking entry-level to mid-level geotechnical engineers and/or geologists. Ideal candidates for the entry level position should have a bachelor's degree in a related field with 0 to 5 years of experience; candidates for the mid-level position should have a master's degree and 5+ years of experience in geotechnical consulting. Our team of 22 engineers and geologists provide geotechnical services for a wide variety of projects including private developments, transportation, ports and harbors, landslides, and water and wastewater facilities throughout the Pacific Northwest.

The ideal candidate will have demonstrated education or field experience in geotechnical engineering, geology, engineering geology, geohazards, and Puget Sound geology.

Depending on your assignment and skill set, you may perform the following work:

- Field monitoring and oversight of soldier piles, tiebacks, soil nails, earthwork and earthwork construction
- Field logging and managing drilling and test pit exploration programs
- Perform geotechnical engineering analysis and calculations and report writing

Minimum qualifications for this position are:

- Must possess a minimum of a BS (MS preferred) in Geotechnical Engineering, Geology, Engineering Geology
- Knowledge of basic engineering and construction principles and schedules
- Proficient in the use of the MS Office Suite. Preferred candidates would have experience in the use of gInt, Slide, LPile, AutoCAD, and GIS
- Effective oral and written communication skills with diverse groups including owners, engineers, architects and contractors
- The ability to work as part of a team in an open office environment and independently in the field, follow instructions, and accept constructive feedback
- The ability to lift and manipulate up to 50 pounds of field equipment and materials;
- The ability to traverse uneven and steep terrain
- Comfort working outdoors around heavy earthwork equipment and traffic in all weather conditions
- A valid Washington State driver's license and a personal vehicle

Desired qualifications for this position are:

- 2-5 years field experience performing geotechnical construction support services and field exploration
- EIT or GIT is preferred, but not required
- Knowledgeable of site work and earthwork construction techniques

Benefits

- Competitive salary and benefit package
- Company paid medical, dental, and vision
- Casual, open work environment
- On the job training, mentoring and coaching
